DETAILED ACTION

Claims 1-21 are pending.

Drawings

The drawings are objected to because the drawings are not in english.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Election/Restrictions

Applicant's election with traverse of Group II, claims 14-21 in the reply filed on July 20, 2006 is acknowledged. The traversal is on the ground(s) that Group I and

Art Unit: 1651

Group II are merely different aspects of a single invention and that the CCPA has recognized a constitutional purpose to claim their invention regardless of the number of statutory classes and further because of fees, etc.. This is not found persuasive because the inventions as claims are classified differently which creates a serious burden on the Examiner to examine all of the claimed inventions. However, the Examiner does recognize that this may create a financial burden for the Applicants. Thus, although the restriction requirement is maintained the claims may be rejoined upon the indication of allowable subject matter so long as all of the claims are of the same scope. Note the following:

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not

Art Unit: 1651

commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Therefore, The requirement is still deemed proper and is therefore made FINAL, however, the claims can be rejoined if the above guidelines are followed by Applicants.

Claims 1-13 are hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on July 20, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Vidal (US 5232911) or EP 0 246 861 (EP), both cited on enclosed PTO-1449 Form.

Claims are drawn to composition comprising phospholipase from a *Crotalus durissus terrificus*.

Vidal teach a composition comprising phospholipase from a *Crotalus durissus terrificus*. See the abstract and column 4, line 57.

EP teaches teach a composition comprising phospholipase from a *Crotalus durissus terrificus*. Note the abstract and page 10, lines 40-41.

The claims are indential to the cited disclosures and are, therefore, considered to be anticipated by the teachings therein.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
